

LiteTouch Neo Expands Into A Complete Wall Box Lighting Control System *New Controllers and Accessory Units Offer System Scalability and IR Integration*

Salt Lake City, Utah (September 8, 2007) - Today, LiteTouch, Inc., announced some new additions to its LiteTouch Neo family of products, which are available for immediate shipping: LiteTouch Neo3, Neo2, Neo 3-Way, and the LiteTouch Neo IR Receiver. These new products round out LiteTouch Neo into a complete lighting control system available for applications ranging from one-room home theater control to a multi-room system perfectly suited for small to mid-size custom projects.

LiteTouch refers to LiteTouch Neo as a “Wall Box Lighting Control System” because of its unique ease of installation for builders, electricians, electrical contractors and remodelers versus traditional residential lighting control systems. LiteTouch Neo is conventionally wired and mounts into a standard electrical box, no specialty tools required.

LiteTouch Neo’s full line of products now consists of:

LiteTouch Neo Controllers

- **LiteTouch Neo4:** 4-gang configuration to control up to 8 loads.
- **LiteTouch Neo3:** 3-gang configuration to control up to 5 loads.
- **LiteTouch Neo2:** 2-gang configuration to control up to 2 loads.

LiteTouch Neo Accessory Units

- **LiteTouch Neo1:** 1-gang configuration to control 1 load.
- **LiteTouch Neo 3-Way:** 1-gang accessory unit that provides system control from locations where a load is not managed.
- **LiteTouch Neo4 Mimic:** 1-gang accessory unit that automatically mimics all programming of LiteTouch Neo4.
- **LiteTouch Neo Hand-Held Remote Control:** Ships standard with every LiteTouch Neo4, and automatically mimics the programming of the LiteTouch Neo4.
- **LiteTouch Neo IR Receiver:** Control lights from any remote or touch screen.

LiteTouch Neo Load Cartridges

The revolutionary technology that controls the actual dimming and switching on all LiteTouch Neo Controllers.

- **LiteTouch Neo On/Off - Dimmer Cartridges:** 500 Watt max capacity.
- **LiteTouch Neo On/Off High Power- Dimmer Cartridges:** 1000 Watt max capacity.

LiteTouch Neo is easy-to-link into a fully networked system. Up to 32 LiteTouch Neo Controllers can be linked in any combination to create system-wide control of lighting loads. Up to eight Accessory Units can be added to each LiteTouch Controller to accommodate multi-entrance and 3-way applications for easy on/off.

The new LiteTouch Neo products will be debuted to Custom Electronics Professionals at the CEDIA EXPO 2007 in Denver, CO September 6 – 9. Visit LiteTouch at CEDIA, Booth 420 and experience the LiteTouch difference.
